Was this review helpful? by: Anonymous on 14-Feb-2012 I have been using this application for a few years now and it works very well. I haven't ever had a problem with it and never got error messages. It is user friendly and as mentioned above it has been tested on a wide range of PC's so there should be nothing wrong with your computer. by: Anonymous on 10-Feb-2012 I have used this app for a long time and it always had good reviews. After downloading today I found out that it is no longer available and the developer no longer maintains it. I'd suggest sticking with any other options instead. Was this review helpful? by: Anonymous on 14-Jan-2012 Not much to say, the developer seems to be active and people say good things about the software. I used the software for around 2 years now and there haven't been any problems and every time I downloaded it I had no problems so I guess it's good :). Categories What is SoftEmpire? #### Vpn One Click Crack + With Full Keygen For Windows

Vpn One Click is a reliable application that provides you with a simple method for protecting your identity while navigating online by connecting to a virtual private network server. Designed with simplicity in mind, the application only consists of a single window, where you can select the VPN server location, view the connection status and your IP address. There are no other configuration options available, which makes it suitable for any type of user, whether you're a professional or a beginner. The application provides support for multiple VPNs, located in different regions around the world, from USA and Canada, some European countries, all the way to India and Australia. You can choose the desired network or let the program do that for you by choosing the 'Random' option. Once the connection is active, Internet communications are encrypted and your computer is given a false IP address. No matter the application you use (email client, web browser etc.), the connection appears as coming from another location and your identity is hidden, thus preventing unwanted tracking. The server changes every time a connection is made and the application does not log connection details. Together with the integrated virtual firewall, these features provide you with an additional security layer, ensuring that the connection is truly safe. The application features unlimited traffic and provides fast navigation speed. Furthermore, changing the IP address results in removing the restrictions that some websites impose for different geographical regions. For instance, you can use it to watch national TV channels while you are abroad. Vpn One Click is an intuitive tool that comes in handy for those who want to anonymize the Internet connection and modify the IP address, in order to stop unwanted interceptions and protect their privacy. Vpn One Click Details: What are the permissions this app gets? Write to SD card. Can it work in the background? Yes. What's the minimum required version of Google Play Store? You need 4.0 and up.
