## What's New In BellCommander?

BellCommander is a powerful audio scheduling application especially developed to play school bells, emergency alarms, announcements and music over existing intercoms, public address systems or other networking devices. You can connect audio players to your existing school bell system and play scheduled messages or alarms. Additionally, you can send live pager or SMS texts in classrooms, dorms or other buildings. BellCommander Features: \* \* Powerful Audio Scheduling \* \* (piper) Easily switch between multiple inputs \* \* Sound Management (audible alarm when speakers muted, mute only when alarm is active) \* \* Change bell tones to popular songs \* \* Ability to play cassette tapes \* \* Remote playback from a PC \* \* Cool Web-based interface \* \* Real-time communication \* \* Group Chat \* \* Ring differently, different duration depending on alarm status \* \* Ability to play music to bell tones or named stations \* \* Text notifier \* \* Easy to use and with outstanding support A DirectShow compatible audio player is required to play sounds. Video messages are also supported. Universal Binary (32/64-bit) Language Support (Mixed): English, German, French, Spanish, Swedish, Portuguese, Japanese, Chinese (Simplified), Dutch, Korean, Turkish, Arabic, Russian and Vietnamese There is 1 hidden feature. \* When you connect two devices, you can choose which device is master and which is slave. During the past semester I have had a couple of students take a look at this app and start asking questions which I attempt to answer in the app description and help section. But there is one thing I have been wanting to do and haven't had time to do yet. The app is distributed as a zip file. When you unzip it and try to open the directory, It claims it is not a Zip archive. One thing that is a MUST if you are going to use an app like this is the ability to open files in the app. That way the user doesn't have to navigate to a separate window to open the programming text file. Unfortunately I don't have time at the moment to make this happen. Also a friend of mine attempted this some time ago and was unable to compile the source because it was "buggy". So, go to these websites and follow the instructions. It took me less then a day to figure out how to add an OSX template to
