Step 3: Create an Account Your web browser must be offline in order to use this software. Thank you. Step 4: Sign in to your Hagerly account and authorize the payment About this script: Screenshots This page was last updated on Jun 28, 2010Please be sure to update your script as changes in the script may make it incompatible with the script editor Q: NodeJS Socket.io client to server i have an app where a client wants to connect to the server and send a file to the server. The server then saves that file in a folder. How can i get the whole process of Socket.IO on nodejs, because i have no clue at all. The process: Client sends a file to the server Server receives the file Server saves the file on the server Can someone send me a source code for that or a link? Thanks in advance, A: You need to add socket.io library to your node server. var http = require('http'); var express = require('express'); var app = express(); var server = http.createServer(app); var io = require('socket.io').listen(server); server.listen(80); io.sockets.on('connection', function (socket) { socket.on('fileData', function (data) { var fs = require('fs'); fs.writeFile(data.fileName, data.data, function (err) { if (err) 6a5af4dab4c

## TopSales Basic

TopSales Basic is a sales analysis, account activity and management system that provides you with the tools needed to be more productive and profitable. Features: New Client Database Compatible with iTunes Create and update clients records (1-10) Saves client data (name, company, address, phone, email, etc.) and it's active status in a client database (ready, inactive, deleted, etc.) Websites linked to clients (properties, sites, etc.) Update client data from internet, facebook or twitter Create and send emails for client action Export client data (same above) to excel Import data from excel (same above) Client status (1-10) List of clients (to see client data) View client activity Sales list (to see customer's orders) Sales list (to export data to excel) Sales analysis Sales report New vendor data (entered from internet, facebook or twitter) Accumulate vendor history Depreciate vendors Add price details to sales Copy price to sale \$19.95 Manager of Desktop Software Manager of Desktop Software is the most cost effective way to sell and distribute your software to thousands of people at once. Create a simple and intuitive desktop application that allows users to setup a one time install and instantly start selling your software. Your application can be downloaded from the web or your own server, and the ability to include an installer or express version makes it very easy to download to start selling right away. If you are the type of person who likes to live in the good old days, then you can still keep your one time install, but also give your users the ability to update the application from the web. Just remember to only include the one time install on your server for the first install, and keep your non-install updated files on your web server. You can also bundle the one time install with your application and send the link out to anyone. This will make it very easy to get the one time install installed on anyone's computer and to take advantage of this market as well. What are people buying software for nowadays? A lot of people are buying software for Mac OS, Windows and Linux systems. They like to use the newest versions, and with Manager of Desktop Software, it's easy for them to do so. With the ability to bundle the one time install with your software, you will be able to capture

## What's New In?

Program version: The Beta version of Basic Apps is available to free registered users. TopSales is an automated sales tool designed for every sales professional who wants to achieve maximum sales of their products or services. It is written in .NET and supports most Windows versions starting from Windows 95. TopSales is built on several powerful concepts that make it quick, easy to use, capable to work on all Windows OS computers, and a great value for money. The TopSales app has been designed in an elegant, straightforward interface, extremely user-friendly, and is backed by a powerful, secure and high performance server technology. With just a few keystrokes, users can have all the orders on their desktop, and with a single mouse click they can process the orders to the accounts receivables, and with one more click they can perform reporting/billing functions. What we offer... TopSales was designed to fulfill the needs of the average salesperson. It is a high-value-for-money solution built upon easy-to-use and efficient concepts, highly powerful and comprehensive analysis, and exceptional support. All these features allow the TopSales application to improve any business process and increase the productivity of any company. What our clients say about TopSales... "I use TopSales for all of my sales. It has changed the way I manage my business. It helps me to be more efficient, and more capable to meet the demands of my business. The fact that TopSales helps me makes it a solid investment for me." Nick, Sales Manager "Our staff can now easily access all important sales information from one single place, regardless of what site they are using for work. TopSales makes it a snap to pick up sales, process sales orders, and provide customer service. I really recommend TopSales to anyone who wants more accurate and easy access to information" Herman, Manager of Sales & Marketing "I consider TopSales as a significant investment for us. Its simplicity and effectiveness helps us to have a better control of our business by optimizing the flow of data and reducing the possibilities of errors. Its facilities make our job easier and more efficient." Kathy, IT Manager "I consider TopSales as a significant investment for us. Its simplicity and effectiveness helps us to have a better control of our business by optimizing the flow of data and reducing the possibilities of
