I think these are 32-bit versions. From your note, I'm not sure if you're using 32 or 64 bit stats. If you need a 64-bit superpac, .NET Framework now supports it, and you can get it by running `./configure --prefix=/path/to/install.config`. In the 64 bit installer, you have an install option. If you are using 32-bit stats, then the installation obviously requires 64 bits. In a 32-bit installation of the .NET Framework, you can use the `-prefix=/path/to/install.config` command-line option to specify a 32-bit installation path.
