After all, they know best. So how do you argue with a man who has the biography of Charlemagne in one hand and Karl Marx's collected works in the other? I'm not being facetious. After all, the list of those who have described him as, among other things, "calm and brave," "genuine and wise," "intelligent," "inexhaustible in information," "incomparable speaker," "informative and stimulating," "thoughtful,"

and “charismatic,” is just so long, it takes, as Aristotle said, too long to count. This is the new era of leadership we are in. In defense of the strong-willed, the decisive, the doers, and others who defy weak leaders, it’s worth remembering that if the current batch of leaders had done what they should have done, events of importance would have happened. The list of those who would not have been born who, if not for them, would not have lived includes Solomon, Alexander the Great, Hannibal, Alexander the Great, William Shakespeare, Johann Gutenberg, and the Wright brothers, among others. For, in a weak world, the ability to lead risks not being tested. The “self-sufficiency” of this sort of leader is tested when their authority conflicts with the views of others who are more powerful than they. This is not intended as a criticism. It is an acknowledgment that the peerless leader is never truly peerless when he must be of a goodly mind and a goodly body if he is to defeat a foe, whereas a skeptic is just that – a skeptic. Indeed, the ability of a leader to mobilize the forces of others creates things, as history has shown, which are greater than the sum of their parts. For example, Lincoln, Churchill, Woodrow Wilson, and Franklin Roosevelt, to name but a few, were gifted orators who understood that the words they spoke counted for more than anything they might have accomplished with their swords. Lincoln’s Gettysburg Address, Wilson’s
