

# OK Engineers: Premier Brass Couplings Manufacturer

OK Engineers stands as a trusted leader in manufacturing high-quality brass couplings and precision-engineered fittings. With expertise spanning diverse industries, we deliver durable, corrosion-resistant brass components tailored to meet exacting standards. Our commitment to excellence ensures custom solutions that exceed expectations in every application.

# Superior Brass Couplings: Quality & Standards

## Premium Materials & Compliance

Our brass couplings are manufactured using premium brass alloys including C36000 and C37700, ensuring exceptional strength and superior corrosion resistance. Every product meets rigorous international standards including ASTM B453, IS-319 Grade III, and ISO 9001:2015 certification.

We offer comprehensive size ranges from 1/8" to 4" with multiple thread configurations including BSP, NPT, and Metric threads to suit diverse application requirements.

## Precision Engineering

Each coupling undergoes precision machining processes to guarantee leak-proof performance in demanding environments. Our products are engineered for high-pressure applications, reliably handling pressures up to 1200 PSI whilst maintaining structural integrity.

Advanced manufacturing techniques ensure consistent dimensional accuracy and superior surface finish across every batch.

# Manufacturing Excellence & Capabilities

## Advanced Manufacturing

State-of-the-art CNC machining, cold forging, and casting technologies integrated under one roof for complete production control

## Custom Solutions

Tailored design and production capabilities to match precise client specifications and unique application requirements

## Quality Assurance

Automated quality control systems ensuring zero-defect output with high consistency across every production batch

## Global Reach

Rapid delivery capabilities backed by extensive export experience serving clients across 85+ countries worldwide

# Key Brass Coupling Types & Applications

## Brass Couplings

Essential connectors for joining pipes in plumbing systems, gas distribution networks, and hydraulic applications with secure, leak-proof connections

## Adapters & Reducers

Versatile components designed to connect different pipe sizes and materials seamlessly, ensuring compatibility across diverse systems

## Unions & Nipples

Facilitate easy maintenance procedures and enable efficient pipe extensions whilst maintaining system integrity and accessibility

## Industry Applications

Our brass couplings serve critical roles across plumbing infrastructure, HVAC systems, oil & gas operations, chemical processing facilities, fire protection systems, and precision instrumentation networks.

# Why Choose OK Engineers?

01

---

## Proven Expertise

Over 20 years of trusted manufacturing excellence in India's brass fittings sector, delivering consistent quality and innovation

02

---

## Value Engineering

Competitive pricing structures that never compromise on quality standards or delivery timelines, ensuring optimal value

03

---

## Global Trust

Strong customer satisfaction record with industrial and commercial clients worldwide, built on reliability and performance

04

---

## Partnership Commitment

Partner with OK Engineers for precision brass couplings engineered to last, backed by responsive support and technical expertise
