Online gambling has grown rapidly over the past decade, and one of the most popular card games in Southeast Asia is Ceme Poker. Among the many online platforms offering this exciting game, Nagapoker has become a well-known name for players seeking entertainment, strategy, and potential winnings. In this article, we will explore what Ceme Poker is, how it works on Nagapoker, why it is popular, and some useful tips for beginners.

## What is Ceme Poker?

Ceme Poker, also known as Ceme Keliling or Domino Ceme, is a card game that uses domino cards instead of traditional playing cards. The game is closely related to Domino QQ, but the rules are simpler and faster, making it attractive to both beginners and experienced players.

In Ceme Poker, each player receives two domino cards. The goal is to get a total value closest to 9. The scoring system works by adding the total number of pips (dots) on both cards, and only the last digit counts. For example, if your total is 15, your final score is 5. If your total is 18, your score is 8.

The highest possible score in Ceme Poker is 9. The player with the highest score wins the round.
